

**132583 to 132586. PRUNUS spp.**

132583. Received as *Cerasus maximoviczii*, a name for which a place of publication has not been found.

132584. *Koslowskaje*.

132585. *Ozimaja Krasnaja*, a plum.

132586. *Renclod Reforma*, a plum.

132587 and 132588. *PRUNUS SPINOSA* L.

Sloe, blackthorn.

132587. *Těrn Sladkyi*.

132588. *Těrn Dessertny*.

132589. *PYRUS*. Malaceae.

Pear.

*Finlandskaja Zholtaja*.

**132590. SORGHUM sp. Poaceae.**

From British East Africa. Seeds presented by D. C. Edwards, Officer in Charge, Grassland Improvement, Nairobi. Received April 11, 1939.

A variety cultivated by the natives as a food crop. It is apparently perennial and may have possibilities as a forage crop.

**132591 and 132592.**

From Puerto Rico. Seeds presented by Claud L. Horn, Agricultural Experiment Station, Mayaguez. Received April 11, 1939.

132591. *PERSEA KRUGH* Mez. Lauranceae.

Collected in the Maricao Forest. An evergreen tree, sometimes 45 feet high, with oblong-lanceolate to elliptic, leathery leaves 2 to 4 inches long and globular, black drupes about  $\frac{1}{2}$  inch in diameter. Native to Puerto Rico.

132592. *TABEBUIA GLOMERATA* Urban. Bignoniaceae.

A handsome tree about 30 feet high, with long-petioled 5-foliolate leaves with obovate leaflets 2 to 6 inches long, acuminate at the apex. In late February, when nearly leafless, it is covered with clusters of bright-yellow flowers about  $\frac{1}{2}$  inch long. Native to Trinidad and Tobago.

**132593 to 132611.**

From England. Seeds presented by the Director, Royal Botanic Gardens, Kew, Surrey. Received April 10, 1939.

132593. *ALLIUM FARRERI* W. T. Stearn. Liliaceae.

An onion native to Siku, China, with 4 to 6 linear leaves 10 to 15 inches long and lax umbels of 6 to 20 campanulate red-purple flowers.

For previous introduction see 132067.

132594. *ACER GRISEUM* (Franch.) Pax. Aceraceae.

Paperbark maple.

A handsome maple up to 30 feet in height, native to western China. The coarsely toothed trifoliate leaves are 1 to 2 inches long. The striking feature of this maple is the cinnamon-brown papery bark which flakes off like that of the river birch.

For previous introduction see 97500.

132595 to 132597. *DEUTZIA* spp. Hydrangeaceae.

132595. *DEUTZIA MONBEIGII* W. W. Smith.

For previous introduction and description see 132364.

132596. *DEUTZIA SCABRA* Thunb.

Fuzzy deutzia.

132597. *DEUTZIA SIEBOLDIANA* Maxim.

Siebold deutzia.

This is the lowest growing of all the deutzias, of a very compact habit, with small white, loose flower panicles which are not very conspicuous. Native to Japan.

For previous introduction see 49943.
